Note - Deprecated Hetzner Plans

If your service is currently running on an older Hetzner plan that has been deprecated, it will also be subject to a price increment starting April 1st. Deprecated plans are not listed in the tables above but are still affected by Hetzner's infrastructure-wide pricing update.

Suggestion - Migrate from Deprecated Plans or Choose a More Cost-Effective Option

If you are running a service on a deprecated Hetzner plan not listed above, or if you're looking for a more cost-effective option, we recommend migrating to a currently available plan to benefit from better pricing and continued support.

You have two options:

- **Clone to a new Hetzner plan:** Clone your existing service and select one of the currently available Hetzner plans.
- **Clone to Netcup:** Netcup offers competitive pricing and is a strong alternative; you can clone your service and choose a Netcup plan instead.

“ To clone a service, go to your service dashboard, click **Clone this Service**, at right side top and select the desired provider and plan.
