

Overview

A robust backup strategy is fundamental to keeping data safe.

By default, Elest.io automates a 3-2-1 backup strategy for all new services.

3 copies of your data exist at all times.

2 are kept in geographically distinct data centers in your selected region.

1 backup is kept on-site for fast restoring.

- [Automated remote backups](#)
- [Automated VM Snapshots](#)
- [Local backups](#)
- [External Backups](#)

Each backup type has different retention periods and characteristics.
