

Overview

All billable resources are attached to a project. At the beginning of each hour, your resources will be billed and the hourly cost will be deducted from the project owner's balance.

If your balance reach zero your services will be suspended and you won't be able to restart them until you add credits to your balance. You must have at least \$5 of credits on your balance to be able to start a service.

Once your services are suspended you have only a few days to add credits to your balance before your services are deleted. Once deleted you have 14 days to restore them. In case of a restoration, you will get a new IP address.

The screenshot shows the Elestio billing interface for project 'elestio-services'. The top navigation bar includes the Elestio logo and a sidebar with menu items: Services, Volumes, Load Balancer, CI/CD, Domains, Members, Billing (highlighted), Project Setting, Audit Trail, Account, Support Tickets, and Documentation. The main content area is titled 'Billing for project elestio-services' and features three summary boxes: '1 Services', '\$0.0140 Cost per hour', and '\$10.22 Monthly cost'. A fourth box shows '\$123.49 Total spend since account creation'. Below these is a search bar for bills by name and a table of billable items. The table has columns for ID, Type, Name, Start Time, End Time, Hours Used, and Billed. The bottom left of the interface shows account status: \$138.51 CREDITS, \$0.0140/hour SPENDING, and an 'Add credits' button. The bottom right of the table area shows pagination: 'Rows per page: 10', '1-10 of 1050', and navigation arrows.

ID	Type	Name	Start Time	End Time	Hours Used	Billed

Invoices are created when you manually add credits to your account or automatically if you have activated the auto-refill option. Invoices only include the amount of credits added to your account.

Billing and resource utilization details are available separately in each project.

Revision #10
