If you click on the **Nodes** tab, you will see a list of all your nodes with detailed information, such as:

- **Node Role:** Indicates whether the node is a **Primary** or a **Replica**.
- **Status:** Displays whether the node is running or not.
- **Specifications:** Includes details about CPU, RAM, and storage.
- **Location:** Shows the data center and provider hosting the node.
- **Actions:**
  - **Promote:** Allows you to promote a **Replica** node to a **Primary** node.
  - **Delete:** Provides the option to remove a node from the cluster.

This interface makes it easy to monitor and manage your nodes efficiently.
