How can I change the name server for elestio domains?

Nameservers are the first thing domain names look to when they need to know where the content of a site is located. Nameservers dictate the DNS, which means you have to set up the DNS records with your nameserver provider.
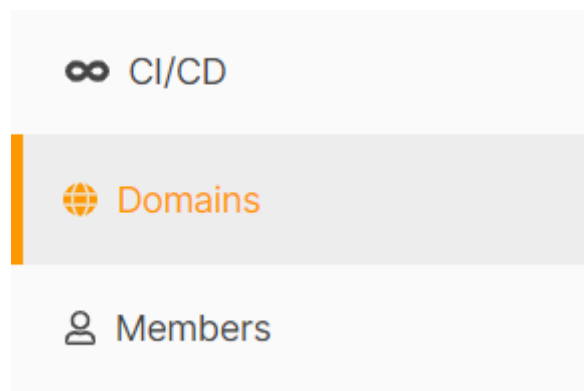

> " If you use elestio nameservers, then elestio manages and hosts your DNS, and everything DNS-related needs to be set up in your elestio account. If you do not use elestio domain nameservers then we do NOT manage your DNS, and you will need to set up the DNS records with your nameserver provider.

In order to manage DNS records or use URL forwarding through elestio, you will need to use our default nameservers which are:

- ns1.name.com
- ns2.name.com
- ns3.name.com
- ns4.name.com

You can add the default elestio nameservers or point others by following the instructions below:

Step 1: Navigate to the *Domains* page from the left sidebar.

Step 2: Select your *domain* from the list to change the name server record.

← **Back to Domains**

🌐 **example.com**
`Aug 03, 2025` ✅ Auto-renew

| Overview | Contact | Security | Email Forwarding | URL Forwarding | DNS | DNSSEC | Transfer |

Domain Name   example.com

Domain Renewals   Secure your domain by adding more years to them   Show

Move Domain   Move Domain to Another Project   Move

Creation Date   Aug 3rd 2023, 6:52 pm

Expiration Date   Aug 3rd 2025, 6:52 pm

Step 3: In the Domain overview, click the *Security* tab.

| Overview | Contact | Security | Email Forwarding | URL Forwarding | DNS | DNSSEC | Transfer |

Domain Lock   Domain can't be transfered.   Domain

Domain Privacy   Privacy Enabled for Whois Records.   Enabled Whois

AutoRenew   Domain will be automatically renewed when it gets close to expiring.

Nameservers   You can edit Domain Nameservers here   Edit N

Step 4: Now, In the NameServers row, click the *Edit NameServers* button.

nameserver 1	nameserver 2	nameserver 3	nameserver 4
ns1vwx.name.com	ns2fgp.name.com	ns3nrz.name.com	ns4lny.name.com

Update Information

Step 5: You can add or update your name server record here. To save your changes, click the *Update information* button.
