

Can I migrate/clone my service to another cloud or region?

Yes, you can migrate or clone a running service to any other target cloud or region by simply clicking the "clone" button on the service dashboard.

>_ Open terminal

🗑 Delete service

Clone this service

The screenshot shows the AWS Management Console interface for a service named 'mastodon-wxhmi2-clone'. The service is in a 'Running' state. The 'Clone this service' button is highlighted in orange. A modal dialog box is open, asking for confirmation to clone the service. The dialog text reads: 'Do you really want to clone this Service ? You are about to clone the service **mastodon-wxhmi2-clone** , please press **continue** to select the service provider, cloud Region, and service plan.' The dialog has 'Cancel' and 'Continue' buttons. The background shows the service dashboard with various tabs like Overview, Tools, Backups, Metrics, Monitoring, Logs, Audit, Security, Alerts, and Notes. There are also buttons for 'Display Admin UI', 'Display OpenSearch', 'Display PgAdmin', 'Restart', 'Change version', and 'Upgrade plan'.
