

Can I migrate/clone my service to another cloud or region?

Yes, you can migrate or clone a running service to any other target cloud or region by simply clicking the "clone" button on the service dashboard.

>_ Open terminal

🗑 Delete service

Clone this service

The screenshot shows a service dashboard for 'mastodon-wxhmi2-clone'. At the top, there are three buttons: 'Open terminal', 'Delete service', and 'Clone this service'. Below these are navigation tabs: Overview, Tools, Backups, Metrics, Monitoring, Logs, Audit, Security, Alerts, and Notes. The dashboard includes sections for Termination protection (Enabled), Admin, OpenSearch, PgAdmin, Software, Service plan, and Support plan. A dialog box titled 'Clone this service' is open, asking 'Do you really want to clone this Service?' and providing instructions to press 'continue' to select the service provider, cloud Region, and service plan. The dialog has 'Cancel' and 'Continue' buttons.
