

Can I migrate/clone my service to another cloud or region?

Yes, you can migrate or clone a running service to any other target cloud or region by simply clicking the "clone" button on the service dashboard.

>_ Open terminal

🗑 Delete service

Clone this service

The screenshot shows the AWS Management Console interface for a service named "mastodon-wxhmi2-clone". The service is in a "Running" state. The interface includes a navigation bar with "Open terminal", "Delete service", and "Clone this service" buttons. Below the navigation bar, there are several sections: "Termination protection" (Enabled), "Admin" (Display your software credentials), "OpenSearch" (Display your OpenSearch credentials), "PgAdmin" (Display your PgAdmin credentials), "Software" (Mastodon), "Service plan" (Server type), and "Support plan" (Level1). A modal dialog box titled "Clone this service" is open, asking "Do you really want to clone this Service ?" and providing instructions: "You are about to clone the service **mastodon-wxhmi2-clone**, please press **continue** to select the service provider, cloud Region, and service plan." The dialog has "Cancel" and "Continue" buttons.
