

Can I migrate/clone my service to another cloud or region?

Yes, you can migrate or clone a running service to any other target cloud or region by simply clicking the "clone" button on the service dashboard.

>_ Open terminal

🗑 Delete service

Clone this service

The screenshot shows the AWS Management Console interface for a service named "mastodon-wxhmi2-clone". The service is in a "Running" state. The console displays various configuration options and actions. A modal dialog box titled "Clone this service" is open, asking for confirmation to clone the service. The dialog text reads: "Do you really want to clone this Service ? You are about to clone the service **mastodon-wxhmi2-clone** , please press **continue** to select the service provider, cloud Region, and service plan." The dialog has "Cancel" and "Continue" buttons.
