

I'm trying to add AWS keys to Elestio but getting an error "You are not authorized to perform this operation" in BYOAWS

This error will appear when adding AWS Access and Secret Credentials keys if your keys do not have AmazonEC2FullAccess access permission on your AWS account.

In order to use these keys, please try to grant permission on your AWS account.

To find out more about generating AWS Access and Secret keys and granting access, see our [documentation](#).
