Overview

Project is a collection of services. It's useful to group your services by project name.

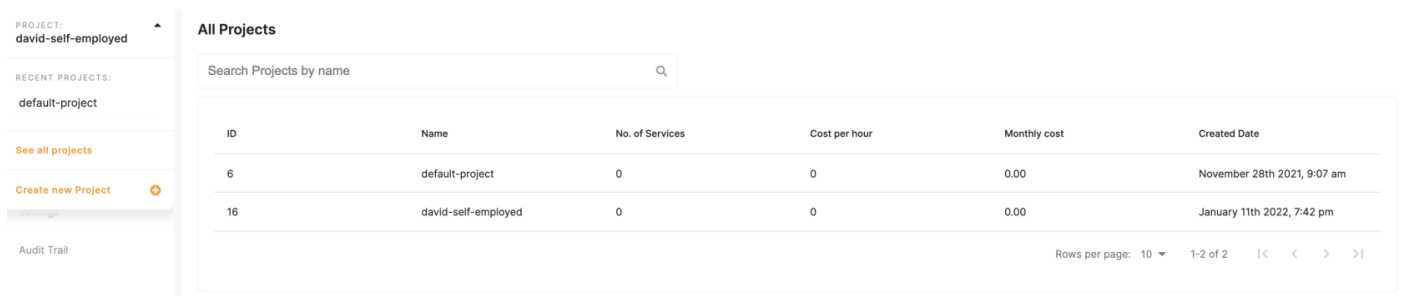

All services are billed to the owner of the project. You can invite coworkers as read-only or admins of your projects, this way they can use the different resources safely.

Only the owner of the project can create a new service.

When creating an account, you will automatically be added to the `default-project` project as Administrator Project Owner.

You must manually associate Projects and Roles within your Team. A GIF outlining the process is below.

You can see all of your projects by clicking on Project dropdown and `See all projects`.

The screenshot shows a web interface for managing projects. On the left is a sidebar with the following items: 'PROJECT: david-self-employed' with an upward arrow, 'RECENT PROJECTS: default-project', 'See all projects' (highlighted in orange), 'Create new Project' with a plus icon, 'Settings', and 'Audit Trail'. The main area is titled 'All Projects' and contains a search bar 'Search Projects by name' with a magnifying glass icon. Below the search bar is a table with the following data:

ID	Name	No. of Services	Cost per hour	Monthly cost	Created Date
6	default-project	0	0	0.00	November 28th 2021, 9:07 am
16	david-self-employed	0	0	0.00	January 11th 2022, 7:42 pm

At the bottom right of the table area, there is pagination information: 'Rows per page: 10', '1-2 of 2', and navigation icons for first, previous, next, and last.

Each project has its own global private network based on [Nebula](#).

Create a project

Click on **Project** dropdown and **Create new Project**

PROJECT:

elestio-services

2. Project information

- Give a name to your project
- Give a description of your project
- Give an email where you will receive all the technical information related to plan sizes, performance, and maintenance. If no email is specified, we will still send information to the project owner user.

Manage projects

Changing project settings

Select **Settings** from the left menu.

You can easily rename your project, change the technical email target and update the project description.

Don't forget to press **Save** to store your update!

The screenshot shows the 'Settings' page for a project named 'elestio-services'. The left sidebar contains a menu with the following items: Services, Volumes, Load Balancer, CI/CD, Domains, Members, Billing, Project Setting (highlighted), and Audit Trail. The main content area is titled 'Settings' and includes a 'Delete Project' button in the top right corner. The settings are organized into three sections: 'Project Name' with a text input field containing 'elestio-services'; 'Technical Email' with a text input field containing 'Enter Technical Email'; and 'Project Description' with a large text area containing 'Hey'. An orange 'Save Information' button is located at the bottom left of the settings area.

Delete a project

How do I delete a project?

Only owners and admins of projects have permission to delete a project.

1. Click on **Project Settings** in the left menu
2. Select **Delete Project**

A user must always have at least one project.

In order to delete a project, it must be free of any services.

We'll always ask for your permission before confirming deletion, so if you click this button by accident, fear not!

Leave a project

Read-only users are able to leave projects.

1. Select **Members** in the left menu
2. Select the **Leave Project** icon to the right of the project you wish to leave

The screenshot shows the Elestio interface for managing project members. On the left is a sidebar with the Elestio logo and a menu for the 'elestio-services' project, including options like Services, Volumes, Load Balancer, CI/CD, Domains, **Members** (highlighted), Billing, Project Setting, and Audit Trail. The main area is titled 'Members' and features a table of current members. Each row displays the user's email, their role (Admin or project owner), when they were added, and an icon to manage their status. An '+ Add Member' button is in the top right, and a 'Test' button is at the bottom right.

User Email	Member type	Created	
[redacted] project owner)	Admin	8 months ago	
[redacted]	Admin	5 months ago	

Update AWS Account Access and Secret Credentials

You can update your AWS Access and Secret Credentials at any time inside your project settings.

To update AWS account credentials, go to the project settings in the left sidebar and then to the AWS Account tab.

Enter your AWS Account Administration New access Access Key and Secret Key here, then click the *Update Credentials* button to validate your new AWS access credentials.

Project

AWS Account

Connected Account Number: XXXXXXXXXXXX

 On your AWS account, please make sure that you have granted an **Administration** access to these keys and enabled regions in which your services are running.

Access key

XXXXXXXXXXXXXXXXXXXXXXXXXXXX

Secret key

.....

Update Credentials

When you click **Update Credentials**, a confirmation prompt will appear. If you want to update your credentials, click **Update**; otherwise, click **Cancel** to reject the update.

Aws Access Credentials

Do you really want to update your AWS access credentials?

WARNING Please make sure that you have enabled the regions where your services are running on your AWS account and granted **Administration** access to these keys; otherwise, your actions could have an adverse effect on the services that are currently running in these projects.
