Projects

- Overview
- <u>Create a project</u>
- Manage projects
- Delete a project
- Leave a project
- Update AWS Account Access and Secret Credentials

Overview

Project is a collection of services. It's useful to group your services by project name.

All services are billed to the owner of the project. You can invite coworkers as read-only or admins of your projects, this way they can use the different resources safely.

Only the owner of the project can create a new service.

When creating an account, you will automatically be added to the default-project project as Administrator Project Owner.

You must manually associate Projects and Roles within your Team. A GIF outlining the process is below.

You can see all of your projects by clicking on Project dropdown and See all projects.

PROJECT: A david-self-employed	All Projects

Delete a project

How do I delete a project?

Only owners and admins of projects have permission to delete a project.

- 1. Click on Project Settings in the left menu
- 2. Select Delete Project

A user must always have at least one project.

In order to delete a project, it must be free of any services.

We'll always ask for your permission before confirming deletion, so if you click this button by accident, fear not!

Update AWS Account Access and Secret Credentials

You can update your AWS Access and Secret Credentials at any time inside your project settings.

To update AWS account credentials, go to the project settings in the left sidebar and then to the AWS Account tab.

Enter your AWS Account Administration New access Access Key and Secret Key here, then click the *Update Credentials* button to validate your new AWS access credentials.

	Project	AWS Account		
Connected Account Number: XXXXXXXXXXXXXX				
On your AWS account, please make sure that you have granted an Administration access to these keys and enabled regions in which your services are running.				
Access key		Secret key		

Update Credentials				

When you click **Update Credentials**, a confirmation prompt will appear. If you want to update your credentials, click **Update**; otherwise, click **Cancel** to reject the update.

L	Aws Access Credentials	×
XXX	Do you really want to update your AWS access credentials? WARNING Please make sure that you have enabled the regions where your services are running on your AWS account and granted Administration access to these keys; otherwise, your actions could have an adverse effect on the services that are currently running in these projects.
