# Overview

Creating a project assigns you an administrator role as the **project owner**. As an administrator (Admin) you can invite people to a project and assign them specific access.

## To invite a member:

1. Select **Members** from the left menu
2. Press the **Add Member** button
3. Enter the member's email address and select their access level
4. **Send Invitation**

The screenshot shows the 'Members' page in the Elestio interface. On the left is a sidebar with the 'elestio' logo and a list of navigation items: Services, Volumes, Load Balancer, CI/CD, Domains, Members (highlighted), Billing, Project Setting, and Audit Trail. The main content area is titled 'Members' and features an '+ Add Member' button in the top right. Below the title is a table with columns for 'User Email', 'Member type', and 'Created'. The table contains two rows of member data. The first row shows a user with the email 'project owner)' and an 'Admin' role, created '8 months ago'. The second row shows another user with an 'Admin' role, created '5 months ago'. Each row has an icon in the rightmost column: a person icon for the first member and a person with a plus sign icon for the second. A 'Test' button is visible at the bottom right of the table area.

User Email	Member type	Created
project owner)	Admin	8 months ago
	Admin	5 months ago

## Member Roles:

### Admin (Project owner)

When you create a project, you are automatically assigned as a project owner. You can create a service, remove members and create/edit and delete services within your project.

### Admin

Administrators are provided full access to services but are unable to create services.

### Read-Only

These members are only allowed to view services and are unable to make any changes.

Only Project owner Admins are billed for services within a project.

# Add a member

Want to invite someone to your team?

## To invite a member:

1. Select **Members** from the Main menu on the left of the Dashboard
2. Press the **Add Member** button
3. Enter the member's email address and select their access level
4. Press **Send Invitation**

**Admins** are authorized to invite more users to a project. Admins have full access to make changes to services.

**Read-Only** members are only allowed to view services but are unable to make any changes.

The invited member will receive a confirmation email containing their username (email) and password. They can use this to log in to the elestio dashboard.

# Delete a member

You can easily delete a member from your project when and if you need to.

Only admins can delete other members.

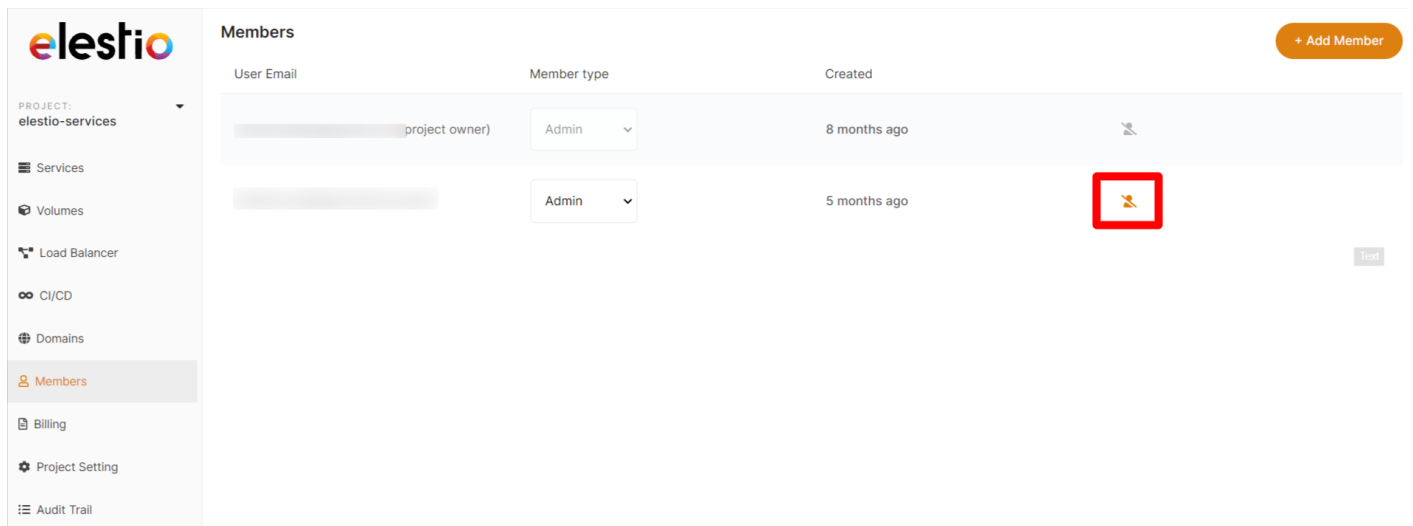

To delete a member:

1. Select **Members** from the Main menu tab on the left of the Dashboard.
2. Click on the user icon to the right of the user you wish to delete.
3. Confirm you really wish to delete the user before pressing **Remove**
4. Deleted users will automatically lose access to your elestio project.

Deleting a member from the elestio dashboard only removes their access to elestio, not your deployed services.

If appropriate, please consider revisiting your service credentials.

The project owner cannot be deleted by other Admins.

The screenshot displays the Elestio dashboard interface. On the left is a sidebar menu with the 'elestio' logo and a list of navigation items: 'PROJECT: elestio-services', 'Services', 'Volumes', 'Load Balancer', 'CI/CD', 'Domains', 'Members' (highlighted), 'Billing', 'Project Setting', and 'Audit Trail'. The main content area is titled 'Members' and features a table with columns for 'User Email', 'Member type', and 'Created'. Two members are listed: the first is 'project owner' with 'Admin' type and '8 months ago' creation date; the second is an 'Admin' type member created '5 months ago'. To the right of the second member's row, a user icon is highlighted with a red square, indicating the target for deletion. An '+ Add Member' button is located in the top right corner of the table area.
