

# Create a project

Click on **Project** dropdown and **Create new Project**

The screenshot shows a user interface for creating a project. At the top, there is a dropdown menu labeled "PROJECT:" with the current selection "elestio-services" and an upward-pointing triangle icon. Below this, under the heading "RECENT PROJECTS:", the project "dev" is listed. A horizontal line separates this from a link that says "See all projects" in orange. Another horizontal line follows, leading to a button labeled "Create new Project" in orange with a plus sign icon to its right.

## 2. Project information

- Give a name to your project
- Give a description of your project
- Give an email where you will receive all the technical information related to plan sizes, performance, and maintenance. If no email is specified, we will still send information to the project owner user.

## Create New Project

**Project Name\***

Awesome project

**Description**

This is the best project anyone has ever made ever because...
