

Create a project

Click on `Project` dropdown and `Create new Project`

The screenshot shows a user interface for creating a project. At the top, there is a dropdown menu labeled "PROJECT:" with the current selection "elestio-services" and a small upward-pointing triangle icon. Below this, under the heading "RECENT PROJECTS:", the text "dev" is listed. A horizontal line separates this from a link that says "See all projects" in orange. Another horizontal line is below that, followed by a link that says "Create new Project" in orange, accompanied by a small orange plus sign icon.

2. Project information

- Give a name to your project
- Give a description of your project
- Give an email where you will receive all the technical information related to plan sizes, performance, and maintenance. If no email is specified, we will still send information to the project owner user.
