

# Delete a member

You can easily delete a member from your project when and if you need to.

Only admins can delete other members.

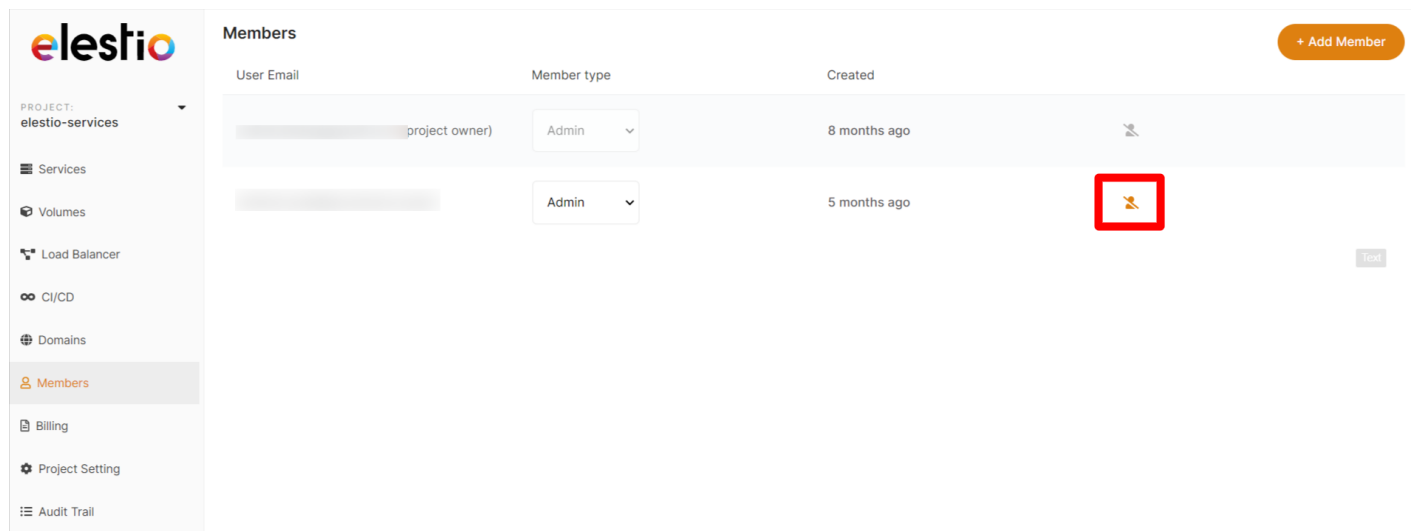

To delete a member:

1. Select **Members** from the Main menu tab on the left of the Dashboard.
2. Click on the user icon to the right of the user you wish to delete.
3. Confirm you really wish to delete the user before pressing **Remove**
4. Deleted users will automatically lose access to your elestio project.

Deleting a member from the elestio dashboard only removes their access to elestio, not your deployed services.

If appropriate, please consider revisiting your service credentials.

The project owner cannot be deleted by other Admins.

The screenshot shows the Elestio dashboard interface. On the left is a sidebar with the 'elestio' logo and a menu including 'Services', 'Volumes', 'Load Balancer', 'CI/CD', 'Domains', 'Members' (highlighted), 'Billing', 'Project Setting', and 'Audit Trail'. The main area is titled 'Members' and contains a table with columns 'User Email', 'Member type', and 'Created'. There are two rows of members. The first row shows a 'project owner' with 'Admin' type, created '8 months ago', and a user icon. The second row shows another 'Admin' created '5 months ago', also with a user icon. A red square highlights the user icon in the second row. In the top right corner of the main area, there is an orange button labeled '+ Add Member'. At the bottom right of the table, there is a small 'Total' label.

User Email	Member type	Created
project owner)	Admin	8 months ago
	Admin	5 months ago

Revision #6
