

Delete a member

You can easily delete a member from your project when and if you need to.

Only admins can delete other members.

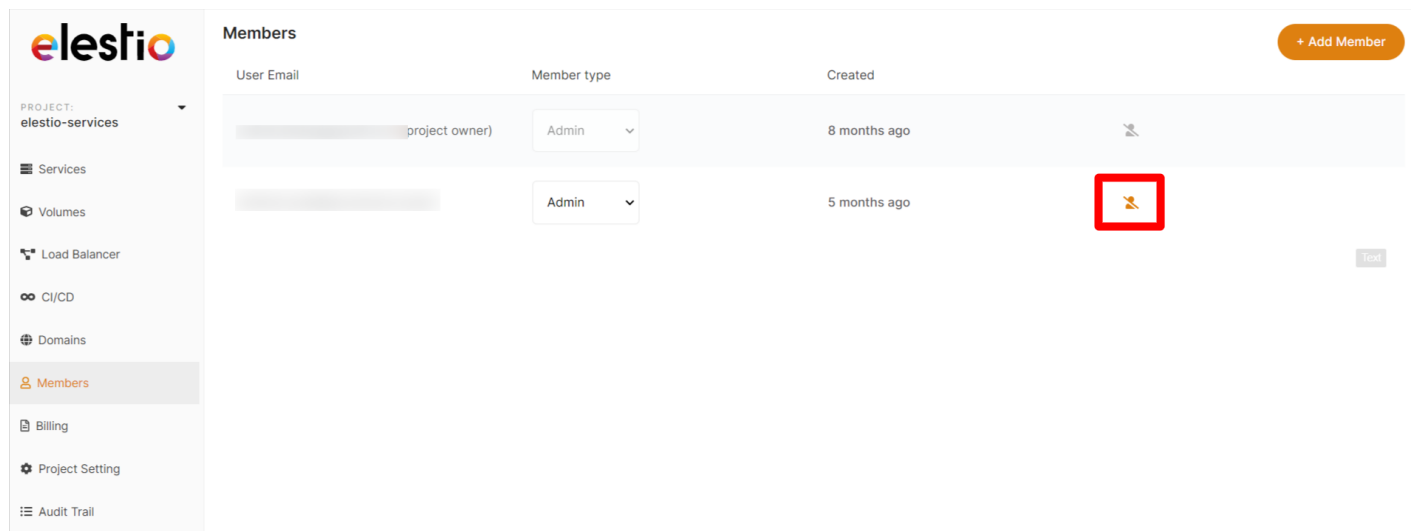

To delete a member:

1. Select **Members** from the Main menu tab on the left of the Dashboard.
2. Click on the user icon to the right of the user you wish to delete.
3. Confirm you really wish to delete the user before pressing **Remove**
4. Deleted users will automatically lose access to your elestio project.

Deleting a member from the elestio dashboard only removes their access to elestio, not your deployed services.

If appropriate, please consider revisiting your service credentials.

The project owner cannot be deleted by other Admins.

The screenshot shows the Elestio dashboard interface. On the left is a sidebar with the 'elestio' logo and a menu including 'PROJECT: elestio-services', 'Services', 'Volumes', 'Load Balancer', 'CI/CD', 'Domains', 'Members' (highlighted), 'Billing', 'Project Setting', and 'Audit Trail'. The main area is titled 'Members' and contains a table with columns 'User Email', 'Member type', and 'Created'. There is also an '+ Add Member' button in the top right. The table lists two members: one is the 'project owner' (Admin, 8 months ago) and the other is an 'Admin' (5 months ago). A red box highlights the user icon for the second member, indicating it can be clicked to delete the member.

User Email	Member type	Created
[redacted] project owner)	Admin	8 months ago
[redacted]	Admin	5 months ago

Revision #6
