

Delete a member

You can easily delete a member from your project when and if you need to.

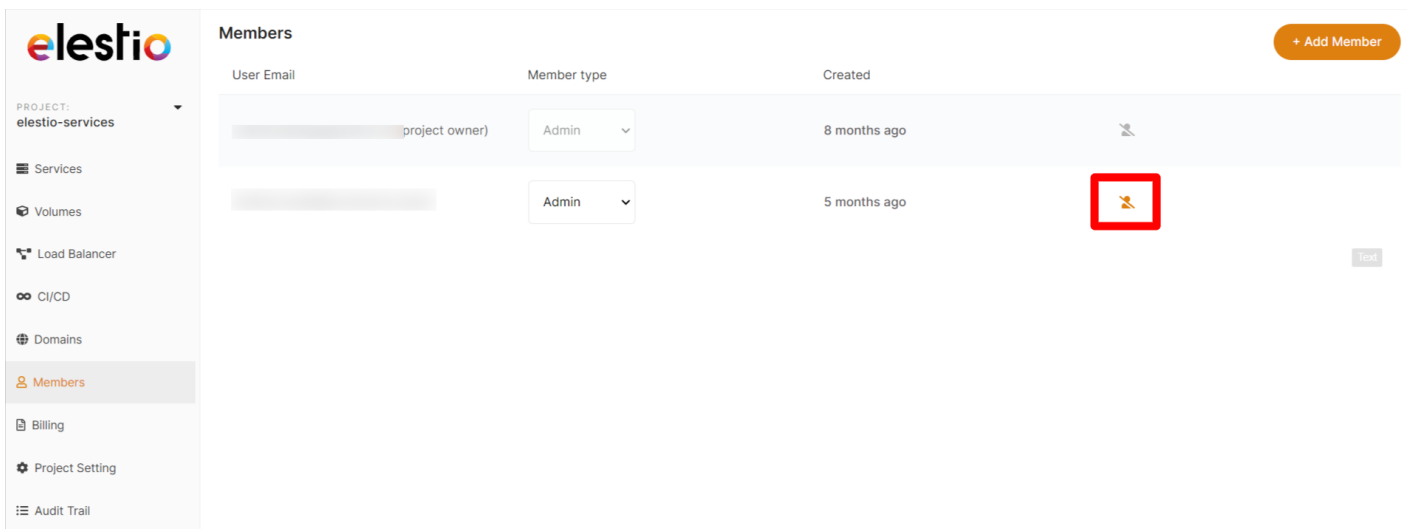

Only admins can delete other members.

To delete a member:

1. Select **Members** from the Main menu tab on the left of the Dashboard.
2. Click on the user icon to the right of the user you wish to delete.
3. Confirm you really wish to delete the user before pressing **Remove**
4. Deleted users will automatically lose access to your elestio project.

Deleting a member from the elestio dashboard only removes their access to elestio, not your deployed services.
If appropriate, please consider revisiting your service credentials.

The project owner cannot be deleted by other Admins.

The screenshot shows the 'elestio' dashboard with a sidebar menu on the left containing options like Services, Volumes, Load Balancer, CI/CD, Domains, Members (highlighted), Billing, Project Setting, and Audit Trail. The main content area is titled 'Members' and features a table with columns for 'User Email', 'Member type', and 'Created'. Two members are listed: 'project owner' (Admin, 8 months ago) and another Admin (5 months ago). A red box highlights the user icon next to the second member, indicating the action to click for deletion. An '+ Add Member' button is visible in the top right corner.

User Email	Member type	Created
project owner)	Admin	8 months ago
	Admin	5 months ago

Revision #6
