

Delete a member

You can easily delete a member from your project when and if you need to.

Only admins can delete other members.

To delete a member:

1. Select **Members** from the Main menu tab on the left of the Dashboard.
2. Click on the user icon to the right of the user you wish to delete.
3. Confirm you really wish to delete the user before pressing **Remove**
4. Deleted users will automatically lose access to your elestio project.

Deleting a member from the elestio dashboard only removes their access to elestio, not your deployed services.
If appropriate, please consider revisiting your service credentials.

The project owner cannot be deleted by other Admins.

The screenshot shows the Elestio dashboard interface. On the left is a sidebar with the 'elestio' logo and a menu for 'PROJECT: elestio-services' including Services, Volumes, Load Balancer, CI/CD, Domains, Members (highlighted), Billing, Project Setting, and Audit Trail. The main content area is titled 'Members' and features a table with columns for 'User Email', 'Member type', and 'Created'. There are two rows of members. The first row shows a 'project owner' with 'Admin' type, created '8 months ago', and a small user icon. The second row shows another 'Admin' created '5 months ago', with a red box highlighting its user icon. A '+ Add Member' button is in the top right, and a 'Total' button is at the bottom right.

User Email	Member type	Created
project owner)	Admin	8 months ago
	Admin	5 months ago

Revision #6
