

# Delete a member

You can easily delete a member from your project when and if you need to.

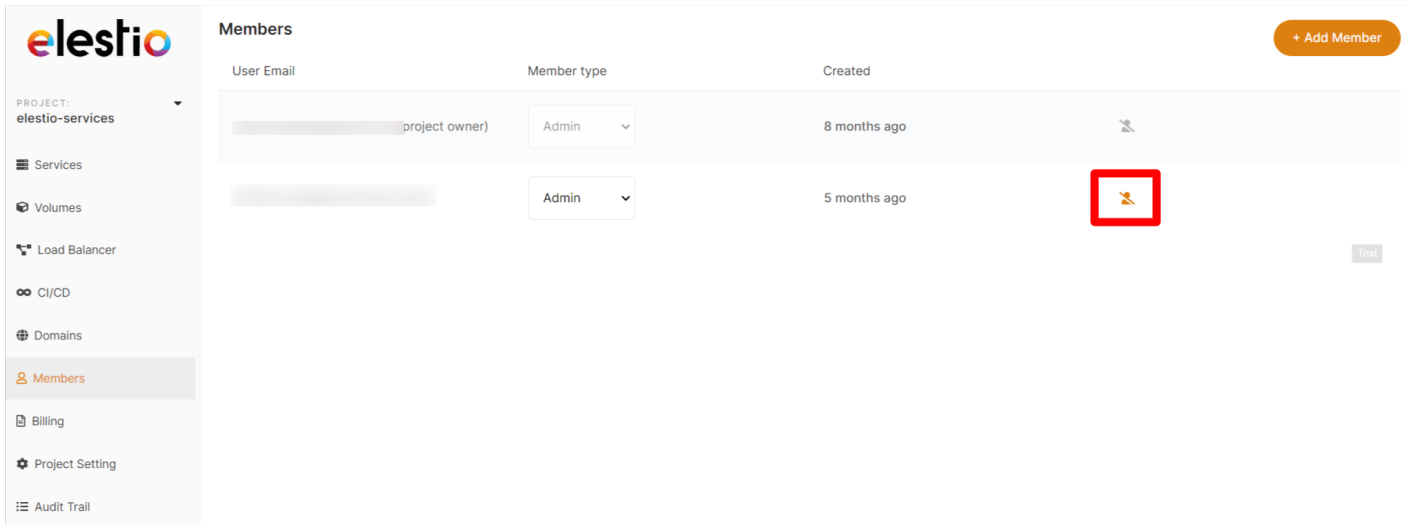

Only admins can delete other members.

To delete a member:

1. Select **Members** from the Main menu tab on the left of the Dashboard.
2. Click on the user icon to the right of the user you wish to delete.
3. Confirm you really wish to delete the user before pressing **Remove**
4. Deleted users will automatically lose access to your elestio project.

Deleting a member from the elestio dashboard only removes their access to elestio, not your deployed services.  
If appropriate, please consider revisiting your service credentials.

The project owner cannot be deleted by other Admins.

The screenshot shows the Elestio dashboard interface. On the left is a sidebar menu with options: Services, Volumes, Load Balancer, CI/CD, Domains, Members (highlighted), Billing, Project Setting, and Audit Trail. The main content area is titled 'Members' and features a '+ Add Member' button in the top right. Below the title is a table with the following columns: 'User Email', 'Member type', and 'Created'. The table contains two rows of member data. The first row shows a user who is the 'project owner' with a member type of 'Admin' and was created '8 months ago'. The second row shows another 'Admin' member created '5 months ago'. A red square highlights the user icon (a person silhouette) in the rightmost column of the second row. A 'Text' button is visible at the bottom right of the table area.

Revision #6
