

# Delete a project

## How do I delete a project?

Only owners and admins of projects have permission to delete a project.

1. Click on **Project Settings** in the left menu
2. Select **Delete Project**

A user must always have at least one project.

In order to delete a project, it must be free of any services.

We'll always ask for your permission before confirming deletion, so if you click this button by accident, fear not!

The screenshot shows the Elestio web interface. On the left is a sidebar with the 'elestio' logo and a list of menu items: PROJECT: elestio-services, Services, Volumes, Load Balancer, CI/CD, Domains, Members, Billing, Project Setting (highlighted with an orange bar), and Audit Trail. The main content area is titled 'Settings' and contains three sections: 'Project Name' with a text input field containing 'elestio-services', 'Technical Email' with a text input field containing 'Enter Technical Email', and 'Project Description' with a large text area containing 'Hey'. A 'Save Information' button is located below the Project Description field. In the top right corner of the settings area, there is a 'Delete Project' button with a trash icon, which is highlighted with a red rectangular box.
