

# Overview

Creating a project assigns you an administrator role as the **project owner**. As an administrator (Admin) you can invite people to a project and assign them specific access.

## To invite a member:

1. Select **Members** from the left menu
2. Press the **Add Member** button
3. Enter the member's email address and select their access level
4. **Send Invitation**

The screenshot shows the 'Members' page in the Elestio interface. On the left is a sidebar with the 'elestio' logo and a menu for 'PROJECT: elastio-services' including Services, Volumes, Load Balancer, CI/CD, Domains, Members (highlighted), Billing, Project Setting, and Audit Trail. The main area is titled 'Members' and has an '+ Add Member' button in the top right. It contains a table with columns 'User Email', 'Member type', and 'Created'. The first row shows a member with a redacted email, role 'Admin', and 'Created' 8 months ago, with a 'Remove' icon. The second row shows a member with a redacted email, role 'Admin', and 'Created' 5 months ago, with an 'Add' icon. A 'Total' button is at the bottom right.

User Email	Member type	Created	
[redacted] project owner)	Admin	8 months ago	
[redacted]	Admin	5 months ago	

Total

## Member Roles:

### Admin (Project owner)

When you create a project, you are automatically assigned as a project owner. You can create a service, remove members and create/edit and delete services within your project.

### Admin

Administrators are provided full access to services but are unable to create services.

### Read-Only

These members are only allowed to view services and are unable to make any changes.

Only Project owner Admins are billed for services within a project.
