

Overview

Creating a project assigns you an administrator role as the **project owner**. As an administrator (Admin) you can invite people to a project and assign them specific access.

To invite a member:

1. Select **Members** from the left menu
2. Press the **Add Member** button
3. Enter the member's email address and select their access level
4. **Send Invitation**

The screenshot displays the 'Members' management interface in the Elestio dashboard. On the left, a sidebar contains navigation links: PROJECT: elestio-services, Services, Volumes, Load Balancer, CI/CD, Domains, **Members** (highlighted), Billing, Project Setting, and Audit Trail. The main area is titled 'Members' and features a table with the following data:

| User Email | Member type | Created | |
|---------------------------|-------------|--------------|--------|
| [redacted] project owner) | Admin | 8 months ago | [icon] |
| [redacted] | Admin | 5 months ago | [icon] |

An orange '+ Add Member' button is located in the top right corner of the table area. A 'Test' button is visible at the bottom right of the interface.

Member Roles:

Admin (Project owner)

When you create a project, you are automatically assigned as a project owner. You can create a service, remove members and create/edit and delete services within your project.

Admin

Administrators are provided full access to services but are unable to create services.

Read-Only

These members are only allowed to view services and are unable to make any changes.

Only Project owner Admins are billed for services within a project.
