

Overview

Creating a project assigns you an administrator role as the **project owner**. As an administrator (Admin) you can invite people to a project and assign them specific access.

To invite a member:

1. Select **Members** from the left menu
2. Press the **Add Member** button
3. Enter the member's email address and select their access level
4. **Send Invitation**

The screenshot shows the Elestio interface for managing project members. On the left is a sidebar menu with options: Services, Volumes, Load Balancer, CI/CD, Domains, **Members** (highlighted), Billing, Project Setting, and Audit Trail. The main content area is titled 'Members' and features a '+ Add Member' button in the top right. Below the title is a table with columns for 'User Email', 'Member type', and 'Created'. The table contains two entries: one for a 'project owner' with an 'Admin' role created '8 months ago', and another 'Admin' role created '5 months ago'. A 'Toot' button is visible in the bottom right corner of the table area.

Member Roles:

Admin (Project owner)

When you create a project, you are automatically assigned as a project owner. You can create a service, remove members and create/edit and delete services within your project.

Admin

Administrators are provided full access to services but are unable to create services.

Read-Only

These members are only allowed to view services and are unable to make any changes.

Only Project owner Admins are billed for services within a project.
