

Overview

Project is a collection of services. It's useful to group your services by project name.

All services are billed to the owner of the project. You can invite coworkers as read-only or admins of your projects, this way they can use the different resources safely.

Only the owner of the project can create a new service.

When creating an account, you will automatically be added to the `default-project` project as Administrator Project Owner.

You must manually associate Projects and Roles within your Team. A GIF outlining the process is below.

You can see all of your projects by clicking on Project dropdown and `See all projects`.
