

Overview

Project is a collection of services. It's useful to group your services by project name.

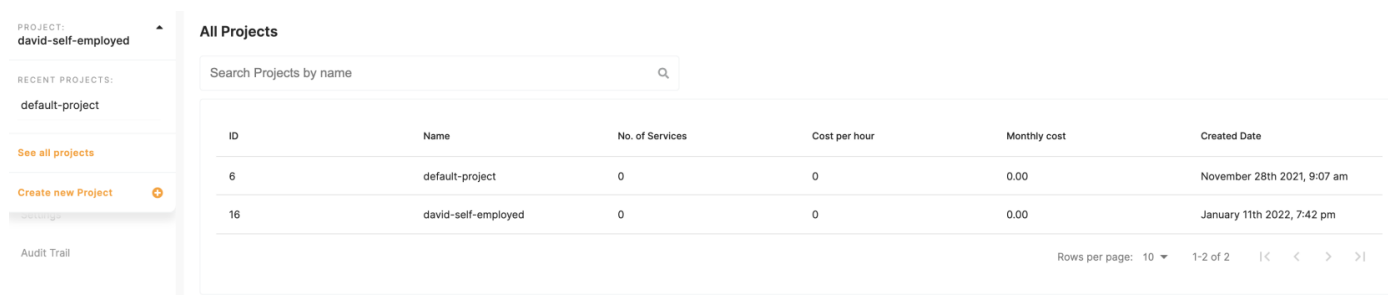

All services are billed to the owner of the project. You can invite coworkers as read-only or admins of your projects, this way they can use the different resources safely.

Only the owner of the project can create a new service.

When creating an account, you will automatically be added to the `default-project` project as Administrator Project Owner.

You must manually associate Projects and Roles within your Team. A GIF outlining the process is below.

You can see all of your projects by clicking on Project dropdown and `See all projects`.

The screenshot shows a web interface for managing projects. On the left is a sidebar with the following items: 'PROJECT: david-self-employed' with an expand/collapse arrow, 'RECENT PROJECTS: default-project', 'See all projects' (highlighted in orange), 'Create new Project' with a plus icon, and 'Audit Trail'. The main area is titled 'All Projects' and contains a search bar 'Search Projects by name' with a magnifying glass icon. Below the search bar is a table with the following data:

ID	Name	No. of Services	Cost per hour	Monthly cost	Created Date
6	default-project	0	0	0.00	November 28th 2021, 9:07 am
16	david-self-employed	0	0	0.00	January 11th 2022, 7:42 pm

At the bottom right of the table area, there is pagination information: 'Rows per page: 10', '1-2 of 2', and navigation arrows.

Each project has its own global private network based on [Nebula](#).

Revision #8
