Update AWS Account Access and Secret Credentials

You can update your AWS Access and Secret Credentials at any time inside your project settings.

To update AWS account credentials, go to the project settings in the left sidebar and then to the AWS Account tab.

Enter your AWS Account Administration New access Access Key and Secret Key here, then click the *Update Credentials* button to validate your new AWS access credentials.

When you click **Update Credentials**, a confirmation prompt will appear. If you want to update your credentials, click **Update**; otherwise, click **Cancel** to reject the update.

Aws Access Credentials

✕

Do you really want to update your AWS access credentials?

WARNING Please make sure that you have enabled the regions where your services are running on your AWS account and granted **Administration** access to these keys; otherwise, your actions could have an adverse effect on the services that are currently running in these projects.

Cancel   **Update**
