VSCode

From the *Tools* tab in the service overview, click on VS Code button to start VS Code in the browser directly in the context of your service.

From there you can edit the configuration, download or upload files with drag&drop on the left column or open a terminal

The first launch can take up to 1-2 minutes while VS Code installs.

The screenshot shows a service overview for 'redis-bgrkj'. At the top left is a Redis icon and the service name. Below it are 'Redis' and 'Running' status indicators. On the right are buttons for 'Open terminal', 'Delete service', and 'Clone this service'. A navigation bar contains tabs for Overview, Tools (selected), Backups, Metrics, Logs, Audit, Security, Alerts, and Notes. The main content area lists four tools: VS Code (Your favorite code editor in your browser), File Explorer (Navigate easily to different folders, upload or download files/folders), Reset Password (Reset your SSH/SFTP password), and Terminal (Access virtual machine consoles). Each tool has a corresponding button on the right.

File Explorer

From the Tools tab in the service overview, click on the "File Explorer" button.

The first launch can take 1-2 minutes because File Explorer is installed on your service. The next launch is nearly instant.

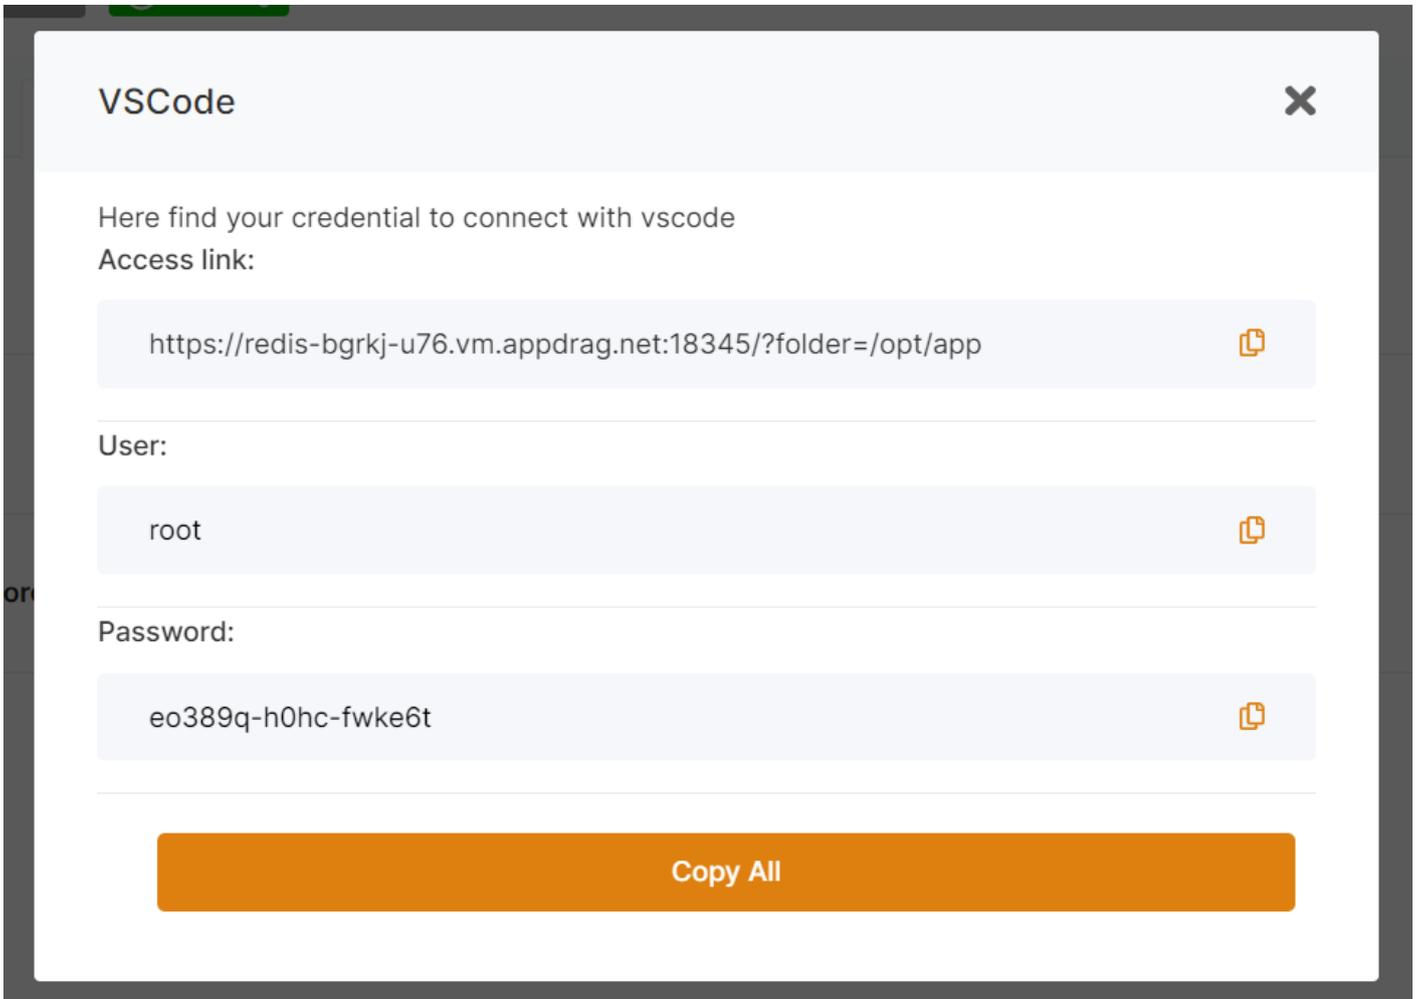

The screenshot shows the service overview for 'redis-bgrkj'. At the top, there is a Redis icon, the service name 'redis-bgrkj', a 'Redis' label, and a green 'Running' status indicator. To the right are buttons for 'Open terminal', 'Delete service', and 'Clone this service'. Below this is a navigation bar with tabs: Overview, Tools (selected), Backups, Metrics, Logs, Audit, Security, Alerts, and Notes. The main content area displays a list of tools:

Tool Name	Description	Action Button
VS Code	Your favorite code editor in your browser	VS Code
File Explorer	Navigate easily to different folders, upload or download files/folders	File Explorer
Reset Password	Reset your SSH/SFTP password	Reset Password
Terminal	Access virtual machine consoles	Terminal

This will open a pop-up window, providing you with a temporary password and Access link.

Copy the temporary password and click on the Access link.

Authenticate with the credentials on the file explorer page:

File Explorer

Once logged in, you'll be able to browse, edit, download, and upload the files on the server:

The screenshot shows the Elestio File Explorer interface. At the top, there is the Elestio logo, a search bar with the text "Search...", and several utility icons (grid, download, upload, info, checkmark). Below the header, a sidebar on the left contains navigation options: "My files", "New folder", "New file", "Settings", and "Logout". The main content area shows the current directory path as "opt > app". A table lists the files and folders in this directory:

Name ↑	Size	Last modified
data	-	6 hours ago
insight	-	6 hours ago
.env	64 B	6 hours ago
cli.sh	78 B	6 hours ago
config.json	104 B	6 hours ago
docker-compose.yml	461 B	6 hours ago
save.sh	83 B	6 hours ago

Web Terminal

From the Tools tab in the service overview, click on the "Terminal" button

The first launch can take 1-2 minutes because the Web terminal is installed on your service. The next launch is nearly instant.

Reset SSH/SFTP Password

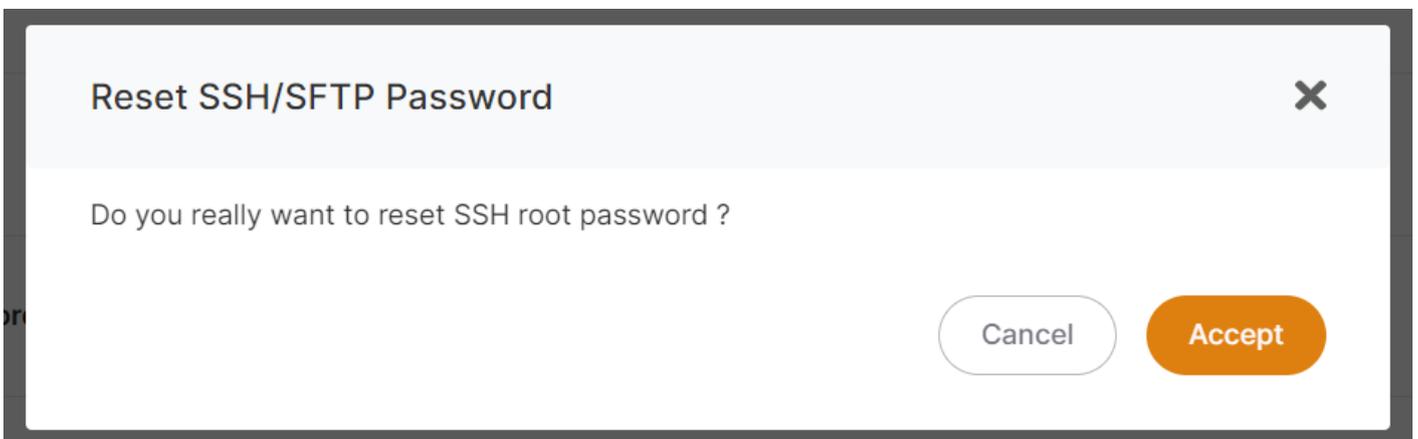

By default, password authentication is disabled. For security reasons, we recommend using SSH Pubkeys instead.

From the Tools tab in the service overview, click on the "Reset Password" button

The screenshot shows the Redis service overview for 'redis-bgrkj'. The service is running. The Tools tab is active, displaying a list of tools:

Tool	Description	Action
VS Code	Your favorite code editor in your browser	VS Code
File Explorer	Navigate easily to different folders, upload or download files/folders	File Explorer
Reset Password	Reset your SSH/SFTP password	Reset Password
Terminal	Access virtual machine consoles	Terminal

The dialog box is titled "Reset SSH/SFTP Password" and contains the question "Do you really want to reset SSH root password?". It has two buttons: "Cancel" and "Accept".
