

Database credentials

This only applies to database software.

You can view your database software in your service Dashboard in the *Overview* tab, by selecting the *Display DB Credentials* button.

The screenshot shows the Redis service dashboard for 'redis-bgrkj'. The service is running. The 'Database Admin' section is highlighted, and the 'Display DB Credentials' button is visible.

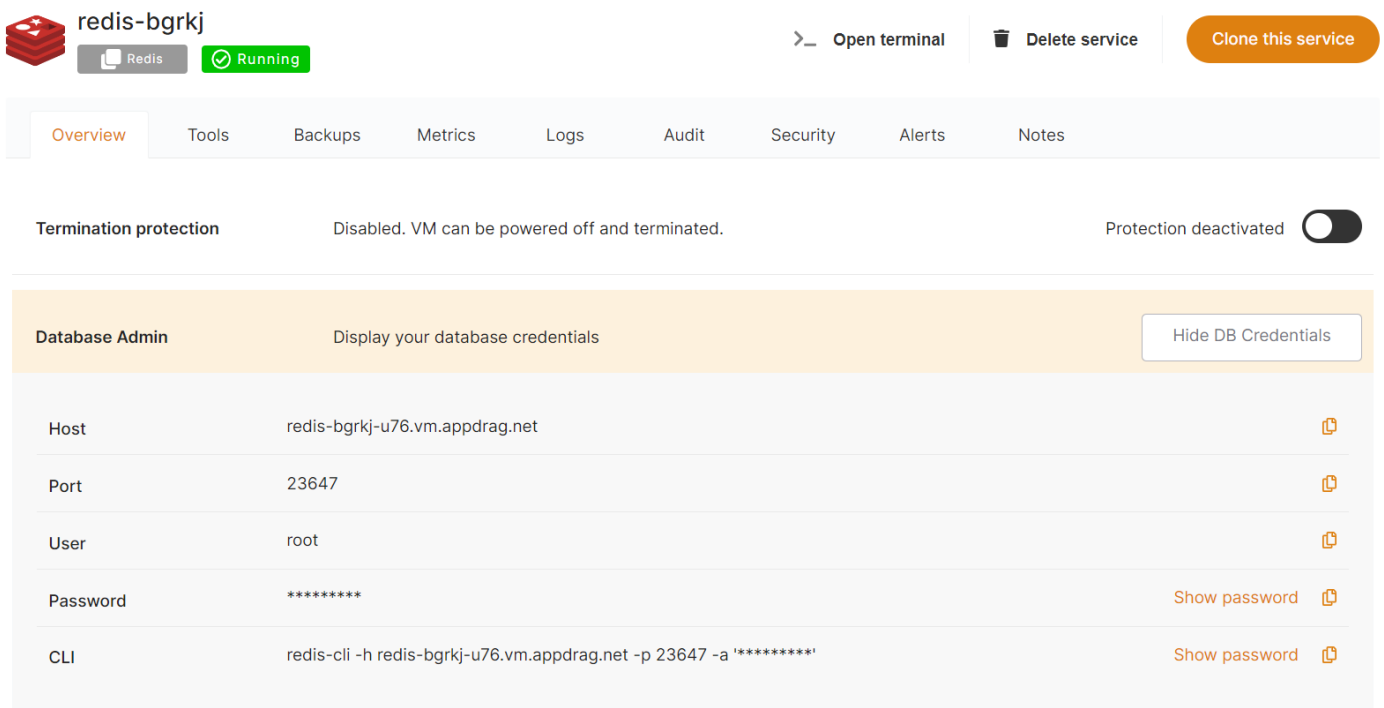

redis-bgrkj Redis Running Open terminal Delete service Clone this service

Overview Tools Backups Metrics Logs Audit Security Alerts Notes

Termination protection Disabled. VM can be powered off and terminated. Protection deactivated

Database Admin Display your database credentials Display DB Credentials

You'll find all the details you'll need to connect to your database directly: host address, port, username and password, and CLI.

The screenshot shows the Redis service dashboard for 'redis-bgrkj'. The 'Database Admin' section is highlighted, and the 'Hide DB Credentials' button is visible. Below the button, a table displays the database credentials.
