

Reset SSH/SFTP Password

By default, password authentication is disabled. For security reasons, we recommend using SSH Pubkeys instead.

From the Tools tab in the service overview, click on the "Reset Password" button

The screenshot shows the service overview for 'redis-bgrkj'. The service is running and has a Redis icon. The 'Tools' tab is selected, showing a list of tools: VS Code, File Explorer, Reset Password, and Terminal. The 'Reset Password' tool is highlighted, and its description is 'Reset your SSH/SFTP password'. The 'Reset Password' button is visible in the tool's interface.

The dialog box is titled 'Reset SSH/SFTP Password' and contains the question 'Do you really want to reset SSH root password?'. It has two buttons: 'Cancel' and 'Accept'.
