

Selected / change software version

You can select another version of your deployed software in your service's *Dashboard Overview*.

1. Click the *Change version* button
2. Choose the software version you'd like to update or change to
3. Don't forget to save!

To apply these new settings, select *Update Now* under Software auto updates.

The screenshot shows the dashboard for a service named 'redis-bgrkj'. At the top, there is a header with the service name, a 'Redis' icon, a 'Running' status indicator, and three action buttons: 'Open terminal', 'Delete service', and 'Clone this service'. Below the header is a navigation menu with tabs for 'Overview', 'Tools', 'Backups', 'Metrics', 'Logs', 'Audit', 'Security', 'Alerts', and 'Notes'. The main content area is divided into several sections: 'Termination protection' (Disabled, VM can be powered off and terminated), 'Database Admin' (Display your database credentials), 'Admin' (Display your software credentials), and 'Software' (Redis, version: 6). The 'Software' section includes four buttons: 'View app logs', 'Update config', 'Restart', and 'Change version'.

Section	Content	Buttons
Termination protection	Disabled. VM can be powered off and terminated.	Protection deactivated <input type="checkbox"/>
Database Admin	Display your database credentials	Display DB Credentials
Admin	Display your software credentials	Display Admin UI
Software	Redis, version: 6	View app logs, Update config, Restart, Change version

Change Version

WARNING Downgrade your version may result in loss of your data but it can be useful if you need to restore an old version
